SMART MULTIPURE

Smart Multipure Water Filtration Systems

Elevate the quality of your drinking water with the revolutionary Smart Multipure system. Powered by Swiss-patented BluAct technology, this advanced water filtration solution is designed to remove multiple pollutants, transforming tap water into the purest form of water. Our innovative approach combines health benefits, convenience, and environmental sustainability, making Smart Multipure the leader in water purification technologies.

Core Technology: BluAct & Protein Nanofibril (PNF)

At the heart of Smart Multipure's unparalleled efficiency is the BluAct technology, featuring the groundbreaking protein nanofibril (PNF). This key ingredient distinguishes our filters from traditional systems, offering superior pollutant removal capabilities.

Smart Features for Enhanced Experience

Real-Time Alerts: Stay informed with automatic notifications for filter changes and water consumption tracking.

Eco-Friendly: Significantly reduce bottled water reliance, cutting down on plastic waste and lowering carbon emissions.

User-Centric Design: Each model is tailored to fit seamlessly into your lifestyle, whether at home or in a professional setting.

Join the Movement Towards Sustainable Living

The Smart Multipure system not only provides access to safe, clean drinking water but also champions environmental stewardship and a healthier lifestyle. By embracing our state-of-the-art filtration technology, you become part of a global shift towards sustainable living.

Discover Pure Water, Redefined

With the Smart Multipure water filtration system, you're not just choosing a product; you're setting a new standard for purity, efficiency, and environmental responsibility. Experience the future of water filtration today and taste the difference with Smart Multipure.

Our Range: Tailored to Your Needs

- 1. Smart Multipure 1.0 Gravity:**
Ideal for effortless installation with no power requirements.

- 2. Smart Multipure 2.0 Faucet:**
A convenient attach-to-faucet model for instant filtration.

- 3. Smart Multipure 3.0 Under Sink:** Designed for out-of-sight, continuous filtration.

- 4. Smart Multipure 4.0 Wallmount TDS:** Offers detailed water quality monitoring with TDS control.

- 5. Smart Multipure 5.0 Net 0:**
The pinnacle of eco-conscious water filtration, aiming for net-zero environmental impact.

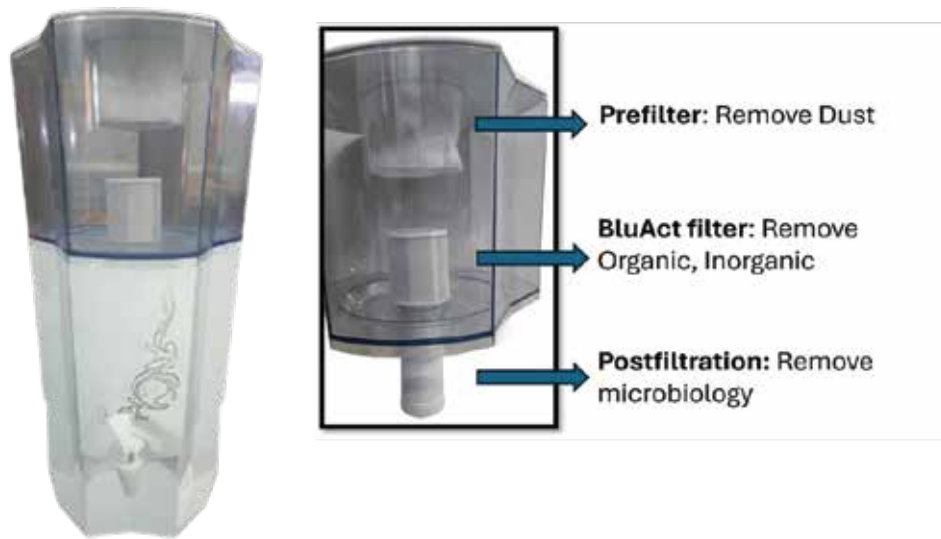

SMART MULTIPURE 1.0 Gravity

Introducing our revolutionary household drinking water filtration system, designed to provide your family with high-quality drinking water without the need for electricity or tap connections. Utilizing the innovative BluAct patented technology, which combines protein nanofibrils (PNF) with advanced prefiltration and ultrafiltration membranes, our system delivers unparalleled purity through a simple gravitation dripping process.

Key Features:

- **Energy-Free Operation:** Works without electricity, offering an eco-friendly solution to pure drinking water.
- **No Tap Connection Required:** Easy to install and use anywhere in your home.
- **Advanced BluAct Technology:** Incorporates PNFs for superior contaminant removal, ensuring safe and clean water.
- **Multi-Stage Filtration:** Prefiltration and ultrafiltration membranes work together to remove particles, sediments, and finer impurities.

Benefits:

- **Eco-Friendly:** Reduces reliance on bottled water, cutting down plastic waste and carbon emissions.
- **User-Friendly:** Simple gravitation system means anyone can set it up and maintain it with ease.
- **Safe and Pure:** Provides your family with the highest quality drinking water, free from harmful organic, inorganic and biological contaminants.

Elevate your home's drinking water quality with our cutting-edge filtration system, and enjoy the peace of mind that comes with knowing your water is pure, safe, and sustainably sourced.

Technical Specifications

Best performance Flow rate	: 3 Liter / hr
Membrane pore sizes	: 0.5 μm
Filtration method	: Gravity

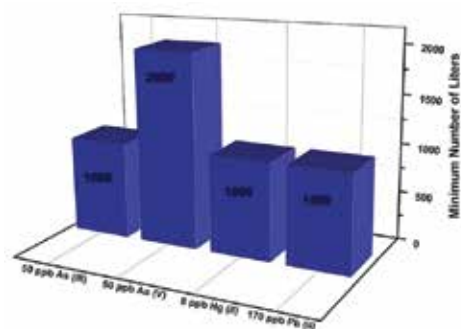

SMART MULTIPURE 2.0 Faucet

The BluAct cartridges is an all-in-one solution for portable water filtration, instantly filter out multiple contaminants from your tap water, especially heavy metals, pesticides and microbiological pollutants bacteria. Cartridge works with the four stages filtration process: 1) a plant-based washable fabric take care of macroparticles and dust, 2) a coconut carbon block take care of your water taste, smell and microfiltration, 3) the BluAct patented granulated media with milk protein remove the heavy metals and organic pollutants, and 4) a last stage hollow fibers take care of the microbiology of water. The counter top device have faucet attachment and the diverter valve, you can instantly filter water directly at the point of use. With the diverter valve attached to the faucet, you can choose when to filter water to avoid any wastage of the filtered water.

Advantages:

- Ultimate portable All-in-One filtration: Removes heavy metals, organic pollutants (pesticides) and microbiological pollutants.
- Easy to Install and easy to use: No need of plumbing
- Instant filtration: Faucet attachment with diverter valve
- Digital flow meter: real time monitoring alert for change of the filters
- Decoloration, deodorization, Better taste of the water.
- Harmones, Chlorine and other trace elements removal.
- No electricity or additional energy is required.
- No additional remineralization is required.
- 100 % throughput of water.

Meet and exceeds NSF53 Standards: Representative Example

The figure shows the minimum number of liters BluAct All-in-One filtration cartridges can treat without replacements for various heavy metals ions according to NSF 53 standards.

Technical Specifications:

Best performance Flow rate	:	0.8 Liter / min
Membrane pore sizes	:	0.1 μm
Approximate differential pressure	:	0.5 bar

Sterilization:

The cartridges can be sterilized with hot water or chlorinated water.
Clogging can be removed by back flushing.

Safety:

No adverse effects are known when the product is used in accordance with its intended purpose. Storage, handling and transportation are not hazardous to humans or the environment. The cartridges should be stored in original packaging in a dry and odorless place, protected against UV radiation. The cartridges should be used within 36 months of the date of production. The Cartridges need to be disposed according the national regulations.

Quality and certification:

During the manufacturing process, the cartridges are continuously tested for consistently high product quality. The cartridges are certified by world health organization (WHO), Switzerland Government and Indian government laboratories.

The Ultimate Under-Sink
Water Filtration Solution

SMART MULTIPURE 3.0 Under Sink

Transform your kitchen into a haven of purity and efficiency with the Smart Multipure 3.0. Designed to fit seamlessly under the sink, this advanced water filtration system offers a sophisticated, space-saving solution that keeps your countertops clutter-free. The only visible sign of this powerful purifier is its sleek, dedicated faucet - a testament to the elegance and simplicity of modern design.

Unmatched Filtration in Five Stages:

The Smart Multipure 3.0 boasts a comprehensive five-stage filtration process, ensuring every drop of water is impeccably clean and safe for drinking:

1. Sediment Filter: Removes large particles such as dust, dirt, and rust, protecting the subsequent filters and extending their lifespan.
2. BluAct Filter: Absorbs Inorganic and organic compounds, improving taste and clarity.
3. Ultrafiltration Membrane: Effectively removing microbiology.
4. Post Carbon Filter: Polishes the water, removing any residual tastes or odors, ensuring the water is deliciously pure.
5. UV Lamp: Provides the final safeguard, destroying 99.9% of bacteria, viruses, and protozoa, guaranteeing the safety of your drinking water.

Space-Saving Elegance

With the Smart Multipure 3.0, your kitchen remains pristine and spacious. The under-sink design does more than save space; it enhances your kitchen's aesthetic, leaving only the sleek faucet visible. This system integrates effortlessly with any kitchen design, from classic to contemporary, making it a perfect fit for any home.

Why Choose Smart Multipure 3.0?

- **Efficient Space Utilization:** Maximizes your kitchen's usable space while providing top-notch water purification.
- **Advanced Filtration Technology:** Delivers exceptionally pure water, removing over 99% of contaminants.
- **Eco-Friendly Solution:** Reduces reliance on bottled water, significantly cutting down plastic waste and supporting environmental sustainability.
- **Easy Maintenance:** Designed for convenience, with easy-to-replace filters and a UV lamp, ensuring continuous, hassle-free protection.

Elevate Your Water, Elevate Your Life:

With the Smart Multipure 3.0, experience the ultimate in water filtration technology. Enjoy the peace of mind that comes with knowing your water is not just pure but also contributes to a healthier lifestyle and a cleaner planet. Upgrade to Smart Multipure 3.0 today and taste the difference.

Smart Multipure 3.0:

Pure Water, Refined Design, Smart Choice.

Transforming Challenging
Water into Pure Perfection

SMART MULTIPURE 4.0 Wall Mount TDS

When faced with the challenge of high hardness, salinity, unknown pollutants, and elevated Total Dissolved Solids (TDS) in your source water, the Smart Multipure 4.0 stands as the unrivaled solution. Engineered to tackle the most demanding water quality issues, our system guarantees the delivery of exceptionally pure and healthy water, regardless of the raw water conditions.

Advanced Filtration for Unmatched Purity

At the heart of Smart Multipure 4.0 lies our state-of-the-art reverse osmosis (RO) nano-filtration membrane, specifically designed to address high TDS, hardness, and salinity. This cutting-edge technology ensures the removal of virtually all contaminants, offering unparalleled purification capabilities.

Eco-Friendly and Efficient

Understanding the importance of sustainability, Smart Multipure 4.0 is optimized to reduce water wastage and energy consumption. Our efficient design ensures that you enjoy not just pure, but also eco-friendly water, aligning with your values of environmental responsibility.

Alkaline Filtration for Health and Taste

Beyond purification, the Smart Multipure 4.0 enriches your water with essential minerals through its integrated alkaline filter. This process not only enhances the health benefits of your drinking water but also improves its taste, making every sip a refreshing experience.

UV Filtration and Safe Storage

Ensuring the safety of your stored water, the Smart Multipure 4.0 incorporates UV filtration within its storage tank. This additional layer of protection guarantees that your water remains pure, safe, and free from any microbial contaminants, ready for consumption anytime.

Why Choose Smart Multipure 4.0?

- **Unrivaled Water Quality:** Tackles high TDS, hardness, and salinity, ensuring your water is pure and safe.
- **Sustainability:** Designed with reduced water wastage and lower energy consumption, reflecting our commitment to the environment.
- **Health and Taste:** The alkaline filter replenishes essential minerals, enhancing health benefits and taste.
- **Safe Storage:** UV filtration safeguards your water, ensuring it remains pristine in storage.

Elevate Your Water Experience with Smart Multipure 4.0

Choosing Smart Multipure 4.0 means opting for the ultimate solution in water purification. No matter the challenge posed by your source water, we guarantee to deliver water that is not only pure and safe but also enhanced for your health and enjoyment. Embrace the Smart Multipure 4.0 and transform your water experience.

Smart Multipure 4.0:

Pure, Healthy, and Sustainable Water Solutions.

The Pinnacle of Zero-Wastage
Water Filtration

SMART MULTIPURE 5.0 Net 0

Elevate your approach to water purification with the groundbreaking Smart Multipure 5.0 Net 0 system. Engineered for efficiency and sustainability, this advanced automatic filtration system is designed to operate with zero water wastage, making it the ideal choice for environmentally conscious households seeking pure, healthy drinking water.

Innovative Filtration for Ultimate Purity

At the core of Smart Multipure 5.0 Net 0 lies the integration of BluAct patented material combined with an ultrafiltration (UF) setup. This powerful combination ensures the removal of impurities while preserving essential minerals, delivering water that's not just pure, but mineral-rich and beneficial for your health.

Sustainability Meets Innovation

The Smart Multipure 5.0 Net 0 system redefines water filtration with its zero water wastage technology. Each drop of water is filtered and utilized, contributing to a sustainable future by eliminating the environmental impact typically associated with conventional water filtration systems.

Automatic Efficiency

Designed with convenience in mind, this system features an automated filtration process that seamlessly integrates with a water reservoir. This ensures a constant supply of purified water, ready whenever you need it, without the need for manual intervention.

UV Filtration and Safe Storage

To guarantee the safety and purity of your stored water, the Smart Multipure 5.0 Net 0 incorporates UV protection. This layer of security ensures that your water remains free from microbial contaminants, providing peace of mind with every glass.

Why Smart Multipure 5.0 Net 0?

- Zero Water Wastage: Embrace sustainable living with our innovative no-waste filtration technology.
- Preserved Minerals: Enjoy water that's not only pure but enriched with essential minerals for your health.
- Automated Convenience: Benefit from a hassle-free automatic filtration system with a built-in reservoir.
- UV Protected Storage: Feel confident in the safety of your water, thanks to UV protection.

Join the Revolution in Water Purification

The Smart Multipure 5.0 Net 0 represents the future of water filtration, combining environmental sustainability with the latest in filtration technology to deliver pure, healthy water. Make the smart choice for your household and the planet with Smart Multipure 5.0 Net 0.

Smart Multipure 5.0 Net 0:

Pure, Healthy, Sustainable.
